EDUCATION

Bachelor of Science: Computer Science (End of 4rth Semester)
Air University Aerospace and Aviation Campus – Kamra, Punjab, Pakistan

PROFESSIONAL SUMMARY

Computer Science student with hands-on experience in competitive programming, algorithm design, and multi-language software development using C++, C#, and Java. Demonstrated ability to craft, test, and refine solutions for complex computational problems, including graph-based algorithms, data structures, and digital logic systems. Certified in C++ Algorithms and Data Annotation for Machine Learning, with practical exposure to AI-generated code evaluation. Proven leader and communicator, having served as President of Coding Arena'25 and Class Representative, with strong capability to articulate technical concepts to both technical and non-technical audiences.

SKILLS

Programming Languages:	C++, C#, Java, Python (beginner)
Algorithms & Data Structures:	DFS, BFS, Graph Traversal, Sorting, Searching
Development Tools:	Visual Studio, VS Code, MySQL, Swing UI, CVAT, Eclipse
AI & Machine Learning:	Data Annotation, AI Code Evaluation, Generative AI
Soft Skills:	Problem-solving, Technical Communication, Teamwork, Leadership
Other:	Digital Logic Design, Graphic Designing (Basic), Digital Marketing

PROJECTS

Maze Explorer – Graph-Based Adventure Game (C++) 2025
Data Structures & Algorithms Project – Air University Kamra
- Implemented DFS algorithm for dynamic maze generation and BFS for shortest path finding.
- Designed modular C++ architecture with real-time rendering and leaderboard management.
- Demonstrated practical mastery of graph theory and algorithmic problem-solving in a complete game system.

Pharmacy Management System (Java / OOP) 2025
Object Oriented Programming Project – Air University Kamra
- Developed a full-featured desktop application with role-based access (admin, seller, customer).
- Integrated MySQL database for inventory management, sales tracking, and real-time stock updates.
- Applied modular class design and controller pattern with Java Swing UI.

Inventory Management System (C#) 2025
Visual Programming Lab Project – Air University Kamra
- Built a fully functional inventory system with role-based authorization and state synchronization.
- Implemented AppState management, AuthService authorization, and controlled cart logic.

Climate Impact Calculator (C++) 2024

Programming Fundamentals Project – Air University Kamra

- Engineered an emissions and AQI calculator with comprehensive input validation and edge-case handling.
- Achieved 100% pass rate across all test cases including invalid inputs, zero values, and large-scale data.

Digital Stopwatch (Digital Logic Design) 2024

DLD Project – Air University Kamra

- Designed a working digital stopwatch using logic gates and ICs, simulated and tested in hardware.
- Reinforced understanding of timing, sequencing, and 7-segment digital display systems.

CERTIFICATIONS

C++: Algorithms – Codio (via Coursera) Sep 2025
Hands-On Data Annotation: Applied Machine Learning – LinkedIn Learning Dec 2025
Digital Marketing – Adobe (via Coursera) Aug 2025
Create Your E-Commerce Store with Shopify (via Coursera) Aug 2025
Graphic Designing (Basic) – PAFWA Skills Development Centre Jul 2025

LEADERSHIP & ACTIVITIES

President – Coding Arena'25 Dec 2025

Department of Computer Science, Air University Kamra

- Led planning and execution of a university-wide competitive coding event, recognized with Certificate of Appreciation by HOD.

Class Representative (CR) – BS CS F'24 B Sep 2023 – Dec 2025

Air University Kamra

- Served as liaison between students and faculty, demonstrating leadership, responsibility, and communication skills.

LANGUAGES

English: Professional Working Proficiency **Urdu:** Native or Bilingual Proficiency
